Art Unit: 1794

Claim37 and 40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis in claims 37 and 40 for "said additive". If applicant intends to indicate –said admixture- then the claims should be amended to recite this feature.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 23, 24, 37, 39 and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tye (5,308,636).

Tye is directed to thickened and gelled systems based on starch and glucomannan. Example 6 is directed to an extruded snack made from konjac, baking powder and cheese powder. The extrusion of the product under appropriate temperature is seen to provide the cooking temperature. The cooking in the extruder is seen to provide the gas bubbles from the expanding dough that is under

Art Unit: 1794

pressure. The baking powder would also be expected to provide a useful source of gas bubbles. The claims appear to differ from Tye in the recitation of an animal based protein concentrate. In this case the cheese powder is taken to be the source of animal based protein. It would have been obvious to one of ordinary skill in the art to use the cheese powder of Tye as the protein source of the claims. It is appreciated that fibers are not mentioned but to include insoluble fibers as bulking agents in Tye would have been an obvious way to alter the texture and caloric content of the extruded snack food. It is also appreciated that the animal proteins of claim 39 are not mentioned but to include meat protein would have been an obvious way to flavor the snack food of Tye.

The rejection if the claims over Harada and Kawano has been withdrawn in response to the amendments to the claims. The indication of allowable subject matter has been withdrawn in view of the new grounds of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.

Art Unit: 1794

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached by dialing 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
